**CMS** — Drupal (7, 9, 10), Wordpress

**VCS** — Git

**Operating Systems** — Linux based (Ubuntu), macOS, Windows

**Package Management** — apt, npm, yarn, brew, composer, pip

## Experience

### Developer, Catalyst IT; Remote (Sydney) — July 2021 - present

Developer working mainly within the Drupal CMS team, in a fast paced software hosting & consulting environment. From April 2023 to November, I was the sole Drupal developer managing multiple (~8) clients, primarily in the government and public health sector. During my tenure I've accrued the following experience:

- **UI:** Creating reusable page templates and UI components based off client specs (Figma, wireframes). Leveraging JavaScript (Vanilla (ES6), jQuery), Twig, webpack, gulp, Sass/Less, and Drupal APIs
- **IaC** CI/CD (GoCD & AWS) pipeline provisioning and development, container orchestration, automation
- un-jQuery(ing) code to Vanilla JS
- Project scoping, discovery & estimates, **agile** development
- ISO27001 compliance
- Module/Plugin development: Creating monitoring/logging services (SRE), Migrations, Medical and government related applications
- Maintainer of Git repositories, PR review.
- First point of contact, incident management (root cause analysis)
- Mentoring & managing junior developers

## Languages

**Natural** — English (native)

**Programming (~4yrs)** — JavaScript (>ES6), Typescript, Python, JSX, CSS3, HTML5, PHP (>7.4), shell (POSIX), SQL, Swift

## Education

**Feb - July 2021** — Ultimo TAFE, Course: NCC:ICT50615 Diploma of Website Development
